The good things in life

OUR JOURNEY

WHO ARE WE?

Since our inception in 1974, quality has been the hallmark of everything we create. Our passion in manufacturing timeless and elegant pieces of furniture using the finest of raw materials and the most talented artisans has earned us the term ‘heart-crafted’ in all we produce.

Our story doesn’t end with the evolution from handicraft products to luxury furniture. We have been privileged to be awarded some of the most prestigious turnkey interior projects in the country from conceptualization to project management and execution. And as our story continues, we want our clients to truly ‘feel’ the designs they love and yearn for which is an extension of themselves and their lifestyle and ultimately helps them truly enjoy being at home.
